

# Environmental/ Climate Change Policy

December 2020

Waterscan Limited recognises that good environmental management and addressing the challenges of climate change must be an integral and fundamental part of its corporate business strategy.

Waterscan is the UK's leading provider of water management services, identifying inefficient uses of water and offering practical and technical solutions that improve water efficiency and reduce costs for our clients. Waterscan operates from 2 offices in Rotherham, South Yorkshire and the head office in Chichester, West Sussex.

Waterscan recognises that its activities impact on the environment, both through the routine internal operations and through the supply, provision and support of its water management products and services. It acknowledges a responsibility for, and commitment to, the protection of the environment at all levels by;

- Reducing travel, through the use of technology and travelling efficiently when it is essential.
- Reducing waste and energy usage.
- Ensuring that all products, services and activities carried out will fully comply with applicable environmental legislation and other requirements.
- Prevention of pollution and the continuous improvement of environmental performance through the engagement of all employees and drive such engagement with our supply chain.
- Ensuring as much purchased material as possible is sourced from sustainable or recycled materials.
- Set targets and objectives and regularly review.
- Monitor and measure our carbon footprint and produce and publish an environmental statement on our website with our environmental performance over the previous 12 months.
- Reduction of Customer water consumption.

This policy sets out the environmental commitments of the company and has been endorsed by the Board of Directors. It applies to all relevant operations and activities of the Company in the UK and wherever Company products and services are supplied, supported or used in the world.

The Company aims to:

- Encourage clients, suppliers and stakeholders to adopt environmental principles.
- Raise employee awareness of environmental issues and the impact they can have on utility usage.
- Integrate environmental objectives into relevant business decisions in a cost effective manner undertaking an aspects and impacts assessment when business changes occur. Review the EMS and publish an environmental policy periodically.
